Raleigh Cortez, Managing Member hello@futurevanguard.net (904) 430-8520

Future Vanguard LLC is a 100 percent woman-owned American company, led and solely owned by Raleigh Cortez, an American-born woman. We serve public institutions with custom software, AI systems, and cloud architecture built to WCAG 2.1 AA from the first line of code, with the speed, security, accessibility, and care that public work deserves. The people who make the commitment remain accountable for the result, from discovery through launch and the handoff the agency can own.

CORE COMPETENCIES

- Custom software development for federal, state, and local government agencies.
- Accessibility engineering to WCAG 2.1 AA, built in from the first line of code rather than remediated after launch.
- AI systems.
- Cloud architecture and infrastructure, including AWS API Gateway, SQS, Lambda, EventBridge, and S3.
- Public-sector website design, hosting, and content delivery.

DIFFERENTIATORS

- A 100 percent woman-owned American company, led and solely owned by Raleigh Cortez.
- Accessibility is engineered into the architecture from the first requirement, targeting WCAG 2.1 AA, rather than added at the end.
- Every engagement carries a dedicated principal-in-charge and direct technical leadership: Raleigh Cortez, Managing Member, as the single point of escalation, and Carlos Guerrero, Chief Technology Officer, leading technical delivery.

TRUST BY DESIGN

Security, accessibility, and speed are not separate finishing passes. We engineer each one to strengthen the other two from the first requirement, from discovery through launch and handoff.

SECURITY	ACCESSIBILITY	SPEED
Protected	Perceivable	Lean
